GENERAL INFORMATION

Single-stage horizontal shaft pumps with main dimensions and characteristics conforming to EN733 (DIN 24255) standards.

- Pump casing: volute type with flanged delivery port.
- Impeller: high efficiency closed type with balanced axial thrust.
Available in either cast iron or bronze.
- Shaft and supports:
the AISI 430 stainless steel shaft (fully protected against contact with the pumped water) is guided and supported by two ball bearings housed in the connecting support that are permanently lubricated with high quality grease to guarantee longer life.
- Seal:
the mechanical type, housed in the connecting support and easily replaceable.
- Coupling to the motor
the NCD series pumps can be coupled to IP 55 standard electric motors with B3 motor mounting. The pumps can be coupled to high-efficiency motors. The BACK PULL OUT constructional concept, connection to the motor with a flexible coupling and spacer, available on request, allow the wet end to be disassembled from the rear for inspection purposes and repairs without disconnecting the motor or the pump casing from the piping.
- Direction of rotation:
clockwise viewed from drive side.
- Port positioning: axial for suction / radial delivery port pointing upwards.

APPLICATIONS

The NCD series standardized pumps have been designed for several applications, such as fire-fighting, industrial water supply, industrial uses, anti-frost protection, irrigation, medium and large heating and air conditioning systems and water supply for both civil and industrial uses.

LIMITS

- Max. temperature of pumped liquid: +90°C (special versions on request +140°C)
- Min. temperature of pumped liquid: -10°C.
- Max operating time with closed discharge and liquid at 90°C: 30 sec.
- Nominal pressure 10/16 bar (with flanging conforming to UNI 2223 PN16/PN25).
- The pumps can operate with all fluids chemically and mechanically compatible with the pump materials.

Special versions can be supplied on request.

CARACTÉRISTIQUES

Pompes monocellulaires à axe horizontal avec caractéristiques et dimensions principales normalisées EN733 (DIN 24255).

- Corps de pompe : type à volute avec orifice de refoulement à bride.
- Roue : de type fermé à haut rendement, avec équilibrage et la poussée axiale.
Disponible en fonte ou en bronze.
- Arbre et paliers:
l'arbre en acier inoxydable AISI 430, (totalement protégé du contact avec l'eau pompée) est guidé et soutenu par deux roulements à billes logés dans le palier de liaison à lubrification permanente par de la graisse haute qualité, en garantie d'une très longue durée.
- Garniture:
de type mécanique logée dans le palier de liaison et facile à remplacer.
- Accouplement au moteur
les pompes série NCD peuvent être accouplées à des moteurs électriques suivant le standard IP 55 dans la forme de construction B3; la pompe peut être accouplée à des moteurs à haut rendement. Le principe de fabrication «BACK PULL OUT» ainsi que l'accouplement au moteur par joint élastique et entretoise d'espacement sur demande permettent de démonter la partie hydraulique par l'arrière pour les contrôles techniques ou la réparation, sans débrancher le moteur et le corps de la pompe des tuyauteries.
- Sens de rotation :
horaire vu côté commande.
- Orientation des orifices : aspiration axiale / orifice de refoulement radiale tourné vers le haut.

APPLICATIONS

Les pompes normalisées série NCD ont été conçues pour de nombreux secteurs d'activité : anti-incendie, réseaux industriels de distribution d'eau, anti-gel, irrigation, installations moyennes et grandes de chauffage et de conditionnement, alimentation en eau potable à usage civil et industriel.

LIMITES D'EMPLOI

- Température max. du liquide pompé : +90°C (des versions spéciales sur demande +140°C)
- Température min. du liquide pompé : -10°C
- Temps max. de fonctionnement à refoulement fermé avec liquide à 90°C: 30 s.
- Pression nominale 10/16 bar (avec brides normalisées UNI 2223 PN16/PN25).
- Possibilité de véhiculer de nombreux liquides chimiquement et mécaniquement agressifs, compatibles avec les matériaux constitutifs des pompes.

Des versions spéciales peuvent être fournies sur demande.

CARATTERISTICHE

Pompe monogiranti ad asse orizzontale con caratteristiche e dimensioni principali secondo le norme EN733 (DIN 24255).

- Corpo pompa: del tipo a voluta con bocca premente flangiata.
- Girante: del tipo chiuso ad elevato rendimento, con equilibratura della spinta assiale.
Disponibile in ghisa o bronzo.
- Albero e supporti:
l'albero in acciaio inossidabile AISI 430, (totalmente protetto dal contatto con l'acqua pompata) è guidato e sostenuto da due cuscinetti a sfere alloggiati nel supporto di collegamento e lubrificati a grasso permanente di alta qualità a garanzia di una più lunga durata.
- Tenuta:
di tipo meccanico alloggiata nel supporto di collegamento e facilmente sostituibile.
- Accoppiamento al motore
le pompe serie NCD, possono essere accoppiate a motori elettrici standard IP 55 in forma costruttiva B3; le pompe possono essere accoppiate a motori ad alto rendimento.
Il concetto costruttivo BACK PULL OUT e l'accoppiamento al motore con giunto elastico e distanziale spaziatore su richiesta consentono lo smontaggio posteriore della parte idraulica per l'ispezione o la riparazione, senza sconnettere il motore ed il corpo pompa dalle tubazioni.
- Senso di rotazione:
orario visto dal lato comando.
- Orientamento bocche: aspirante assiale / premente radiale rivolta verso l'alto.

APPLICAZIONI

Le pompe normalizzate serie NCD sono state studiate per i settori di utilizzo quali antincendio, acquedottistica, industriale, antibirina, irrigazione, impianti di riscaldamento e condizionamento di medie e grandi dimensioni e approvvigionamento idrico sia ad uso civile che industriale.

LIMITI D'IMPIEGO

- Temperatura max. liquido sollevato: +90°C. (esecuzione su richiesta +140°C.)
- Temperatura min. liquido sollevato: -10°C.
- Tempo max di funzionamento a bocca chiusa con liquido a 90°C.: 30 sec.
- Pressione nominale 10/16 bar (con flangiate secondo UNI 2223 PN16/PN25).
- Possibilità di veicolamento di tutti quei liquidi chimicamente e meccanicamente compatibili con i materiali costruttivi delle pompe.

Su richiesta possono essere fornite esecuzioni speciali.

PUMPED LIQUID

Conforming to : DIN 24960 - ISO 3069.

TOLERANCES

Service conditions have been measured with cold water (15°C - 59°F) at 1 bar atmospheric pressure. These tolerances are guaranteed with standard assembly line pumps built according to UNI/ISO 9906 Grade 3B. Catalogue data are for liquids with a density of 1 kg/dm³, and kinematic viscosity not exceeding 1 mm²/s.

REGULATIONS

Parameters not covered by EN733 (DIN24255):

1450 rpm
80-400, 200-400

LIQUIDE À POMPER

Normalisé : DIN 24960 - ISO 3069.

TOLERANCES

Les caractéristiques de fonctionnement ont été mesurées avec de l'eau froide (15°C.) à la pression atmosphérique (1bar). Comme il s'agit de pompes construites en séries, elles sont garanties selon les normes UNI/ISO 9906 Niveau 3B. Les données du catalogue se réfèrent à des liquides ayant une densité de 1 kg/dm³ et une viscosité cinématique qui ne dépasse pas 1 mm²/s.

RÈGLEMENTS

Tailles non prévues en EN733 (DIN24255):

1450 rpm
80-400, 200-400

LIQUIDO DA SOLLEVARE

Secondo le norme : DIN 24960 - ISO 3069.

TOLLERANZE

Le caratteristiche di funzionamento sono state rilevate con acqua fredda (15°C) alla pressione atmosferica (1bar) e vengono garantite, trattandosi di pompe costruite in serie, secondo le norme UNI/ISO 9906 grado 3B. I dati di catalogo si riferiscono a liquidi con densità di 1kg/dm³ e con viscosità cinematica non superiore a 1mm²/s.

NORMATIVE

Grandezze non previste in EN733 (DIN2455):

1450 rpm
80-400, 200-400

BGAD = Base and coupling
* = Indicatives values according to the type of motor installed.

BGAD = Socle et accouplement
* = Valeurs indicatives en fonction de la marque du moteur utilisé.

BGAD = Base e giunto
* = Valori indicativi in funzione della marca di motore utilizzato.

○ Motor in IE4 efficiency class according to EU REGULATION 2019/1781. Available in other efficiency classes for non-EU markets.

○ Moteur en classe de rendement IE4 conformément au RÈGLEMENT UE2019/1781. Disponibilité en différentes classes de rendement pour les marchés hors UE.

○ Motore in classe di efficienza IE4 in conformità al REGOLAMENTO UE2019/1781. Disponibili in altre classi di efficienza per mercati extra UE.
